

Computer, Projectors, and Displays

Jeremiah provides his own current Apple MacBook.

■ Video

Jeremiah has four Thunderbolt 3 ports and his entire presentation is presented from his computer using a 16:9 display ratio at 3840 by 2160.

■ Slide Advancer

The client must provide a DSAN Perfect Cue system (or equivalent) for Jeremiah's direct slide control, which connects to his laptop via a USB-C port.

■ Audio

Jeremiah can use the standard 3.5mm analog audio jack, USB-C ports, or HDMI, whichever you prefer. Please note that an audio connection is required.

■ Computer Location

Jeremiah does not need the computer on stage with him. He prefers the computer to be placed with the AV crew so it keeps the stage clean.

■ Microphone

Jeremiah requires a wireless lavalier or "countryman" microphone connected to a professional audio system.

■ Confidence Monitors

Jeremiah strongly prefers at least one confidence monitor, if possible.

■ AV Testing / Soundcheck

Jeremiah requires an A/V check no fewer than 30 minutes before taking the stage.

■ No Internet Access

Jeremiah presents using his own laptop with all videos, audio, and content embedded in the presentation. As such, no internet access is necessary.

■ No Podium

Jeremiah prefers no podium on stage. If one must be present, it must be pushed back so he may walk in front of it unencumbered.

■ Beverage

Please have a bottle of water available to Jeremiah while on stage.
